

Hacettepe University is the university with the most national and international references in national and international academic journals in Turkey.

The scientific studies that our prominent academic staff carries out are one of the most significant factors of what brings prestige to our university. Hence, each and every scientific study and project conducted by our academic staff is supported. 138 graduate programs of our university are run under the coordination of our 14 graduate schools the Ataturk Institute for Modern Turkish History, Graduate School of Informatics, Graduate School of Child Health, Graduate School of Educational Sciences, Graduate School of Science, Graduate School of Fine Arts, Graduate School of Public Health, Graduate School of Neurological Sciences and Psychiatry, Graduate School of Population Studies, Graduate School of Nuclear Sciences, Graduate School of Oncology, Graduate School of Health Sciences, Graduate School of Social Sciences and Graduate School of Turkish Studies.

Within the scope of OYP (Academician Education Programme), 350 research assistants from 70 universities pursue their education in master, PhD and integrated PhD programs in our university. Thus, Hacettepe University aims to spread its quality of education all over Turkey.

## Besides theory

**We provide high quality health services for over one million people annually.**

With Hacettepe University Adult Hospital, İhsan Doğramacı Children's Hospital and The Hospital of Faculty of Dentistry, we provide high quality health services for patients coming from various regions of Turkey. We also hold a name for being a tutorial hospital dedicated to training both the present and the prospective doctors, dentists, nurses and health professionals by means of technological equipments, laboratory infrastructure, and highly competent staff.

With its modern system of education based on new methods and thoughts, our university is a leader in the fields of medicine and dentistry in Turkey. Oncology Hospital is the first state hospital using cyber knife for the treatment of cancer patients; and İhsan Doğramacı Children's Hospital is the first one to transplant marrow on a twenty-three-day-old baby successfully.

Annually, 600,000 outpatients and 27,000 inpatients are treated, and more than 30,000 operations are performed in our Adult Hospital. 203,000 outpatients, 6,900 inpatients and 60,000 emergency patients are treated at İhsan Doğramacı Children's Hospital; while at Oncology Hospital, 76,000 patients are given outpatient care and 20,000 are provided chemotherapy service. In our hospitals, 720 patients from 31 different countries have been served treatment so far.

**Hacettepe, an international and a leading university**

Nursing, which provides job opportunities in various fields both in our country and in the world, is one of the seven occupational groups recognized to have the right to provide professional services by European Union countries. The Nursing Department, which offered education within the Faculty of Health Sciences since 2007, became a Faculty of Nursing in 2012.

Our undergraduate program aims at helping students to give nursing care in line with changing individual and social needs as well as providing students with the knowledge, skill and understanding necessary for nursing education, management and research fields, and ensuring that students can use the knowledge they have gained in order to protect, improve and preserve health effectively. Students start their education with a preparatory program of English and pursue it in our faculty where the medium of instruction is 30% English. They graduate from our faculty by assuming the title of "nurse" after fulfilling a semi-term internship program in their senior year.

Our Faculty offers undergraduate and graduate programs in eight departments. As well as having in-class theoretical courses, and doing skill and simulation laboratory practices, all of our students receive applied training at establishments that give protective and medical health service.

Our graduates can be employed as staff nurse, charge nurse, nurse consultants, clinical nurse specialists, and advisor at state and private healthcare organizations giving protective, medical and rehabilitative service at national and international level; or as an instructor and director at nursing schools.

## Hacettepe University, Faculty of Law

### Faculty of Law has started to offer bachelor education with 82 privileged students.

Faculty of Law, which started to offer postgraduate program in 2009 and undergraduate program in 2012-2013 academic year, has gained a great success by means of ranking the third among the faculties of law at state universities in terms of students' scores required for the admission to the program. Considering the fact that while choosing a program, prospective students take into account some factors, which are stated below, we expect this success trend to increase more in 2013-2014 academic year.

The medium of instruction is Turkish at the Faculty of Law. However, students can choose one or two out of 12 different foreign language courses throughout their educational life provided that these lectures do not conflict with their current schedule.

The student quota of 82 for 2012-2013 academic year means that students have an ideal educational atmosphere in terms of the number of students in class. When the number of students is kept at such numbers, it is possible to have both more efficient lectures and effective in and out-of-class communication between instructor and students. The students of our Faculty get the opportunity to select from a comprehensive range of courses offered by Elective Courses Unit established at the university. Students are offered an opportunity, and even encouraged to improve themselves in other fields apart from the must courses for the education of law.

Hacettepe, Faculty of Law offers a privileged education of law in Beytepe, which is one of the most beautiful campuses of our country.

Hacettepe, an **international** and a **leading** university

**Hacettepe University Art Program intends to train contemporary, creative and free individuals who have universal ideas and values.**

In our university, with the education provided in Ankara State Conservatory, at the departments of Music, Performing Arts and Musicology, and in the Faculty of Fine Arts, at the departments of Graphic Design, Sculpture, Painting, Ceramics, Interior Architecture and Environmental Design, we aim to develop the creativity of young future artists and designers; and with the contributions of internationally recognized academic staff, we aim to make the students gain the necessary cultural, technical knowledge and skills in their fields.

With the help of elective courses like Communication, Plastic Arts, Photography, Cinema-TV, Turkish Folk Dances, Turkish Folk Music, Turkish Classical Music, Theatre and Diction, we encourage students to diversify their interests and gain experience that is not limited solely to theoretical education.
